Total		18,814.500	Nil

During the month of June, SAFA has no intentions of accessing term markets.

SAFA continues to investigate the potential issue of a 1 year Floating Rate Note (FRN) linked to the Australian Overnight Index Average (AONIA), with monthly coupons. This follows a positive response to the continued investor engagement and the announced ROI process which commenced in March 2019. A capital markets transaction **will** follow in the near future, subject to market conditions.

Information regarding SAFA's proposed issue, coupon calculation methodology and product conventions can be found [here](#). Please direct any enquiry to SAFA or UBS as mandated Arranger.
